

### TAHOE PARTNERS PROVIDES INTEGRATED SOLUTIONS

- We have deep experience in leveraging Microsoft SharePoint 2007 to build enterprise solutions
- Our teams understand how to work collaboratively through the challenges that arise between creative, technology and business needs for web-based, custom and integrated solutions
- Our consultants have deep experience in providing full lifecycle integrated software solutions
- We are skilled in integrating Microsoft SharePoint with your ERP system to capitalize on the benefits of each
- We have a sound understanding of the current trends in IT and can help determine how, when and where to take advantage of these capabilities while minimizing organizational risk
- What you see is what you get - our teams consist of senior consultants with recent hands-on experience. You're getting real experience, not just the credentials
- We focus on delivering executable strategies and seek to share accountability by participating in the implementation of our strategies

### FOCUS AREAS

Our Enterprise Collaboration Solutions focus on enabling information, processes and systems to efficiently and effectively work together. Tahoe Partners leverages the extensive collaboration and integration capabilities of Microsoft Office SharePoint Server 2007 (MOSS) to build strategic enterprise solutions for our clients that streamline business processes for customers, employees, suppliers, and business partners through websites, portals, and applications. Our services include:

#### PROCESS INTEGRATION SOLUTIONS

Process Integration Solutions focus on streamlining structured and unstructured business processes through user collaboration and systems integration. Microsoft Office SharePoint Server 2007 enables collaboration on unstructured content such as Microsoft Word and Excel documents. SharePoint can also manage the workflow to collect additional information and systematically integrate that information with the transactional system such as an ERP. Process Integration Solutions include the following:

- **PRODUCT DEVELOPMENT LIFECYCLE MANAGEMENT SOLUTIONS** - Our Product Development Lifecycle expertise allows us to leverage the collaborative power of Microsoft Office SharePoint Server 2007 to enable multiple departments to work together with unstructured information. Collaboration takes place throughout the entire process, including direct integration with transactional systems that require final product information. We leverage our extensive experience to build solutions that meet your specific organizational needs without the investment required in a large Product Lifecycle Management (PLM) software package.
- **ENTITY ON-BOARDING** - Our Entity On-Boarding solutions focus on leveraging Microsoft Office SharePoint Server 2007 to streamline the processes of bringing new employees, customers, vendors, and other constituents into your organization. These solutions are based on understanding the processes and building the appropriate workflow, metrics, and repository information. Our clients have seen significant cost savings and improvements in customer satisfaction by managing these processes with collaborative solutions.

- **SALES PORTALS** - Tahoe Partners can help you build an effective sales portal based on Microsoft Office SharePoint Server 2007. These portals allow your sales team to easily enter order information and have access to the key data required to create real time customer quotes that automatically integrate directly into your ERP system. We leverage the flexibility of SharePoint to simplify entry while maximizing the power of your ERP.
- **PROJECT MANAGEMENT SOLUTIONS** - Tahoe Partners has extensive experience leveraging Microsoft Office SharePoint Server 2007 as a flexible project management and team collaboration platform. We have worked with clients on a variety of needs from small departmental task management to large scale initiative monitoring at the executive level.

## ENTERPRISE CONTENT MANAGEMENT

Enterprise Content Management solutions focus on helping you manage your content and put the control of that content into the right hands. These solutions encompass all the areas where you manage dynamic content - Intranets, Internets and Extranets - for your customers, partners, employees and other users. Our expertise includes the full lifecycle of enterprise content management solutions, including the creative, functional, and technical disciplines. The following services can be implemented alone or as an integrated solution:

- Website Strategy
- User Experience Design
- Visual and Creative Design
- Site Development
- Project Management / Business Analysis

## ENTERPRISE CONTENT CONVERSION

Enterprise Content Conversion Solutions help migrate, consolidate, and convert web-based content to your Microsoft Office SharePoint Server 2007 platform. Streamlining your content leads to reduced maintenance costs, better availability and usability for users, increased use of the content, and increased manageability. Tahoe Partners' combination of experience, methodology, and products allows our clients to reduce migration costs, accurately preserve content, save time, and reduce the risks associated with content consolidation. Our content conversion solutions address content from numerous sources, including:

- Previous versions of Microsoft SharePoint and other SharePoint sites
- Websites, Intranets, and Extranets
- Content Management Systems
- Shared drives
