

TAHOE PARTNERS PROVIDES INTEGRATED PERFORMANCE MANAGEMENT SOLUTIONS

- Our consultants have deep experience providing fully integrated Performance Management solutions
- Our teams understand how to work collaboratively with you through the challenges that arise between the data architecture, reporting and planning needs
- We have a sound understanding of the current trends within Performance Management and can help you determine how, when and where to take advantage of these capabilities while minimizing organizational risk
- What you see is what you get: Our teams consist of senior consultants with recent hands-on experience. You're getting real experience, not just the credentials
- We focus on delivering executable strategies and seek to share accountability by participating in the implementation of our strategies

FOCUS AREAS

Our Performance Management Services focus on providing integrated technology, processes and solutions that will help your organization answer the following three key questions:

- 1) How are we doing?
- 2) Why are we doing it?
- 3) What should we be doing?

At Tahoe we believe in helping our clients create a culture of analytics that enables the "Real Time Enterprise" through the delivery of timely, actionable information that empowers individuals at all levels within the organization to make informed decisions based on the numbers and not just "gut feelings". Our services include:

BUSINESS INTELLIGENCE

Our Business Intelligence solutions focus on providing the right information to the right people at the right time. These solutions can help you answer the "how's" and "why's" of what is happening within your organization. The goal of all of our business intelligence solutions is to reduce the time to action; allowing your company to develop a competitive advantage based on your ability to react to changing conditions faster than your competition. Our Business Intelligence solutions cover the following areas:

- Reporting & Dashboard Development
- Analysis
- Business Event Management
- Strategy & Vision
- Reporting Extranets
- Integration with SAP & SharePoint

Business Intelligence Solutions provide the following benefits to your organization:

- Provide at a glance view of operational performance
- Ensure organizational accountability and strategic alignment
- Provide self-service reporting to reduce the burden on IT staff
- Create personalized information centers
- Set alerts and deliver time sensitive information via various distribution channels

FINANCIAL PERFORMANCE MANAGEMENT

Removal of manual Excel based planning processes, inability to complete “what-if” analysis, disconnected planning processes, too much time to collect and consolidate planning data, automating the integration of actual data from existing ERP systems in your planning models are just some of the pressing issues that Tahoe Partners is focused on helping our clients resolve.

Through our full lifecycle approach, we can provide project-based solutions for packaged software evaluations, project management, technical leadership, application integration, application optimization and knowledge transfer back to the internal team.

Our Financial Performance Management solutions include:

- **Budgeting & Forecasting** – These solutions help companies dramatically reduce planning cycle times and remove manual, excel based processes.
- **Financial Consolidation & Reporting** – Tahoe Partners helps organizations create more efficient monthly and year end closing processes.

DATA ARCHITECTURE & CONSOLIDATION

The data you collect and process each day as an organization is a valuable commodity. It is imperative that your business managers have the ability to trust that the data is correct, interpret what the data means, and then act on the information that the data is telling them. Our solutions are developed with the view that the data architecture is the foundation for any high performing Performance Management solution. We focus on helping our clients create an information architecture that is optimized to support their both their financial processes and their reporting & analysis needs.

Through our full lifecycle approach, we can provide project-based solutions for the following areas:

- **Data Warehouse & Data Mart Development** - Creating and implementing a database design that will work for your business intelligence solutions is often the difference between a successful BI/DW implementation and a failed one. Our consultants have the experience to create data warehouses from the ground up or make changes to existing databases to fully optimize the reporting and analysis environment.
- **Database Design & Reporting Optimization** – Tahoe Partners has proven experience optimizing reports that run directly off of operational systems, as well as helping to design new database structures to improve the performance of existing reports. We can provide solutions for database design, query optimization, indexing strategies and performance optimization of existing reporting environments.
